MISSION

Where Collaboration Transforms Maternity Care

The Midwifery Project (TMP) partners with licensed midwives, community organizations, and funders to advance midwifery services and support a sustainable workforce.

VISION

A future where every birthing family can access high-quality midwifery care that is fully integrated into the healthcare system and delivered with consistency, respect, and safety across all settings.

Priscilla McFolling
(MS, BSN, RN)

Program Director

Priscilla is a seasoned public health professional and maternal health advocate with 30+ years of nursing experience. As Program Director, she applies her expertise in healthcare administration, strategic planning, and stakeholder engagement to strengthen the midwifery workforce.

The Midwifery PROJECT
A Program of OPQIC

Core Initiatives

- Increasing access to midwifery care for birthing parents and families
- Supporting and growing the midwifery workforce through loan forgiveness
- Raising public awareness and understanding of midwifery
- Improving quality and safety in planned community birth transfers to hospitals.
- Building strong partnerships across the maternity care system

FREE EDUCATION SESSIONS

We offer presentations on topics such as: the midwifery landscape, access to care, health system integration, coordinated & safe transfers, and career pathways. We provide this service to health care teams, policymakers, funders, and more.

Tulsa CNM Loan Forgiveness Program

Tulsa faces significant challenges in maternal health outcomes and provider access. This initiative helps meet these needs by **supporting nurse midwives to train** and serve locally – **easing financial strain** while expanding care.

Full eligibility and application details are available on our website.

Online Directory

Midwifery Supported Facilities

Our directory identifies **where families can access** birth centers and hospitals with midwifery services.

Why Access to Midwifery Matters

- Earlier, more consistent prenatal engagement
- Collaboration, consultation and referrals between providers
- Access to evidence-based, high-quality care options
- Expands access to care in areas with provider shortages
- Reduces unnecessary medical intervention
